1/ Presentation of the tool

This application aims to promote the integration of young graduates into the world of work.
By participating, you contribute to improving the image of vocational training and the implementation of tools to measure the integration of young graduates of technical education and vocational training.

By creating your own account, whether you are a company, a graduate student or a training establishment, all you need to do is fill in your profile and answer the questionnaire that will be offered to you to access tools that promote exchanges and the location of your interests in depending on your region and your activities.

2/ Role of the administrator

Analyze the results

Via the dashboard to view statistics

Via Geo-Location to access Google Maps and interactively view the number and position of Graduates, Companies and Establishments

Manage users:

- Add/remove administrators and supervisors
- Edit/delete Graduates, Companies and Establishments
- Save data state (Database and stored images)

Manage predefined choice lists to guide responses to questionnaires

Countries, Regions, Cities, Currencies

Sectors of activity, Sectors/Professions, Types of employment contracts, Legal statuses

Manage surveys to refine results, manage entry errors, assist investigators and respondents.

Delete / Edit

Clean up job postings and the job response log

Delete / Edit

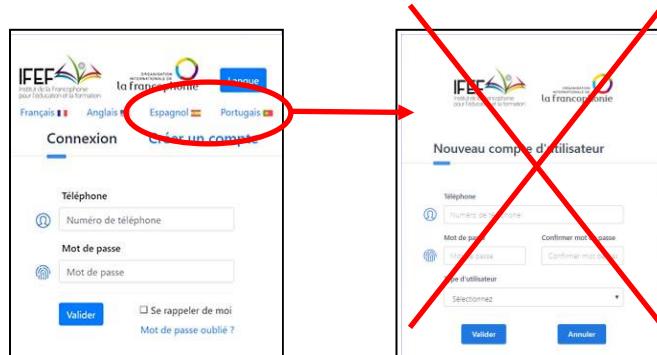

3/ Log in

3.1/ as administrator

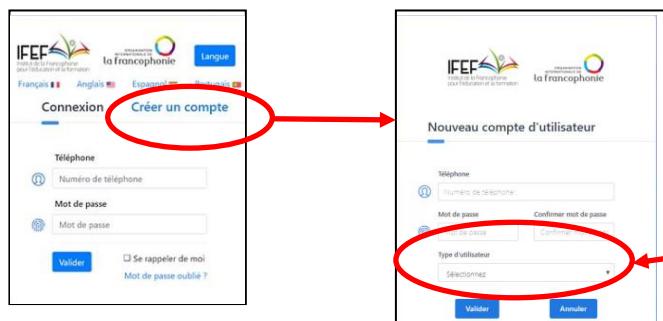

On the internet browser of your choice, go to the following address:<https://inserjeune.francophonie.org/>

The application's connection interface allows you to connect from a telephone number, the country code is required (for example +22177777777).

The profile of the connected person is recognized by the system, the application environment will be adapted. Creating an account with administrator rights is done directly in the application in the Users menu.

3.2/ Creating a new account other than administrator or supervisor

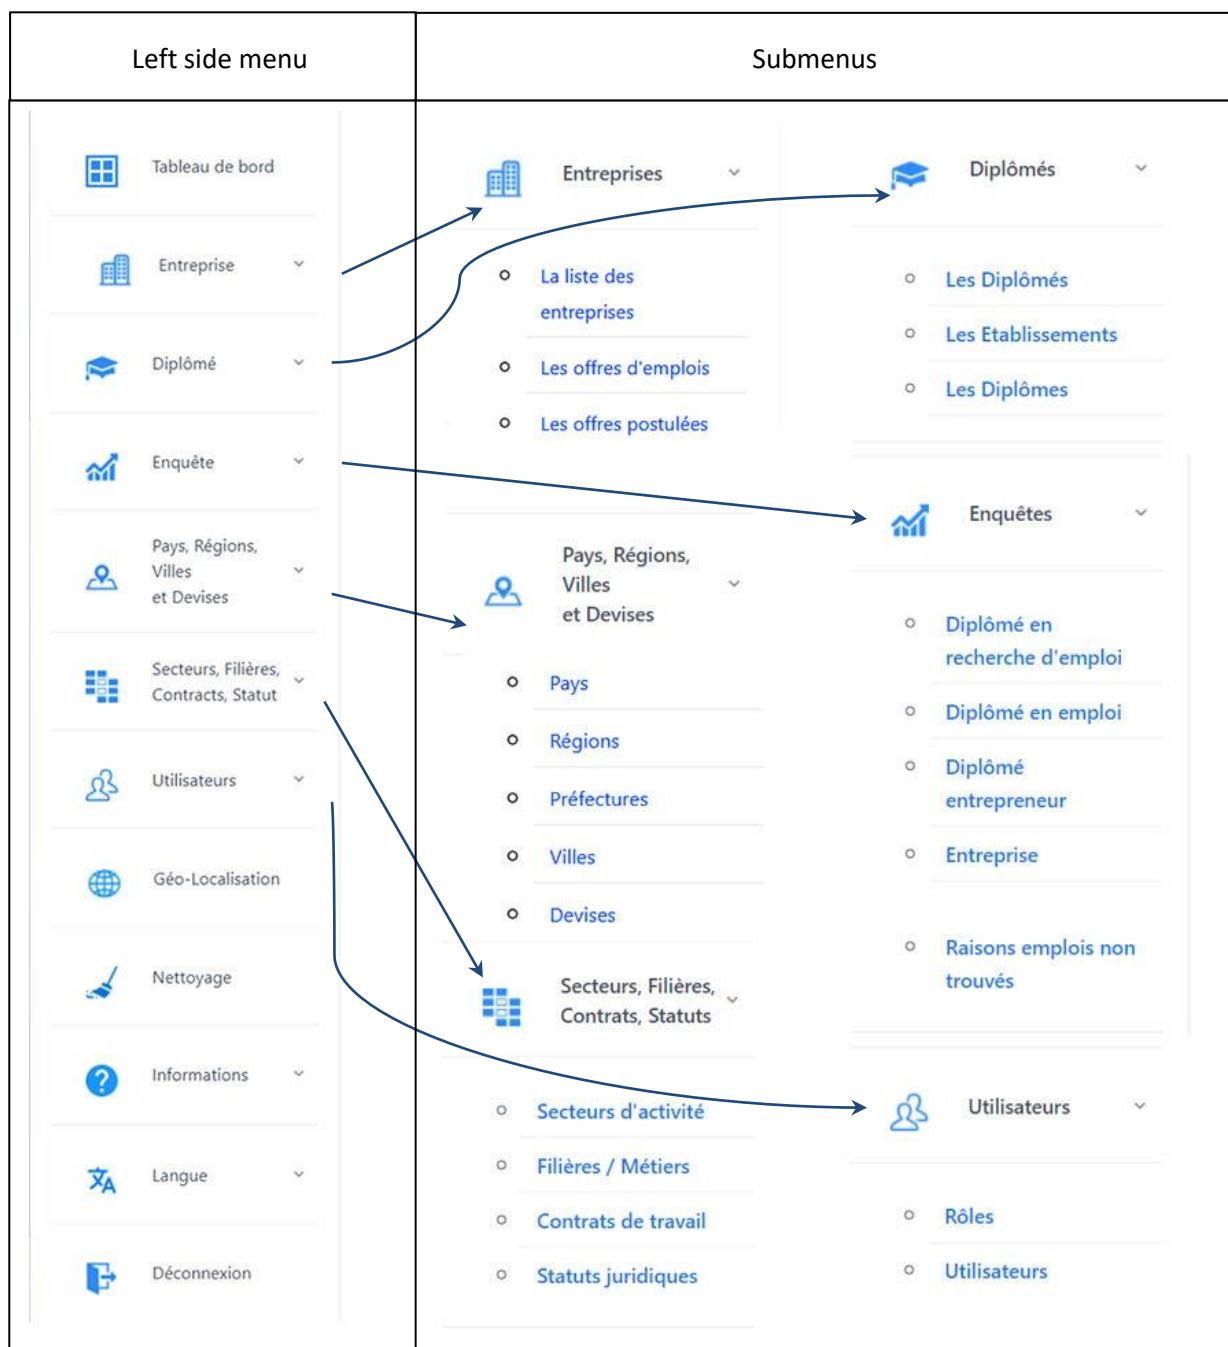

The first screenshot shows the 'Créer un compte' button highlighted with a red circle. The second screenshot shows the 'Type d'utilisateur' dropdown menu highlighted with a red circle.

The phone number is the entry point to the application. It must be in the format:
+indPaysNumber
Example: +221777577777

Choose the type of actor, Company,
Establishment or Graduate

4/ The menu in general

Below, details of all access to the tools via the menus

5/ Predefined Roles

The roles are fixed in the application, there are 5 different ones

5.1/ Administrator roles

The Admin role (Super Administrator) gives the right to configuration,

- to editing and modification:
 - of all the parameterization tables (see chapter 7)
 - profiles of the actors (Graduates, Companies and Establishments)
 - Surveys from stakeholders
- access to geolocation tools and statistics
- managing user accounts
 - editing/deleting actors
 - creation/editing/deleting other administrators
 - creating/editing/deleting supervisors (read rights only)

There are several levels of administration:

- Country Admin (Administrator of a single Country or Province)
- Admin Regions (Administrator of one or more regions)
- Admin Cities (Administrator of one or more cities)

5.2/ the roles of supervisors Director, Legislator, Principal

This role allows a decision maker to

- view statistics
- list establishments, companies and graduates
- view each of the establishment, company and graduate profiles
- view published job offers and log responses to offers
- access the geolocation tool

There are several levels of supervisors:

- Directors (Administrator of all Countries or Provinces)
- Legislator (Administrator of a single Country or Province)
- Principal (Director of a training establishment)

5.3/ the Company role

This role is reserved for companies and gives them the right to:

- create and edit their own profile
- modify the current survey if less than 1 month old or otherwise create a new one.
- publish job offers and view responses to these offers
- broadcast advertisements (planned in next version of the tool)
- use the geo-location tool allowing them to search for establishments or businesses based on the chosen geographic area as well as the desired profession or sector of activity.
- View company statistics

5.4/ the Graduate role

This role is reserved for graduates and gives them the right to:

- create and edit their own profile
- modify the current investigation if less than 1 month old and if their professional situation has not changed or otherwise create a new one.
- view job offers and respond to them
- use the geo-location tool allowing them to search for establishments or businesses based on the chosen geographic area as well as the desired profession or sector of activity.

5.5/ the Establishment role

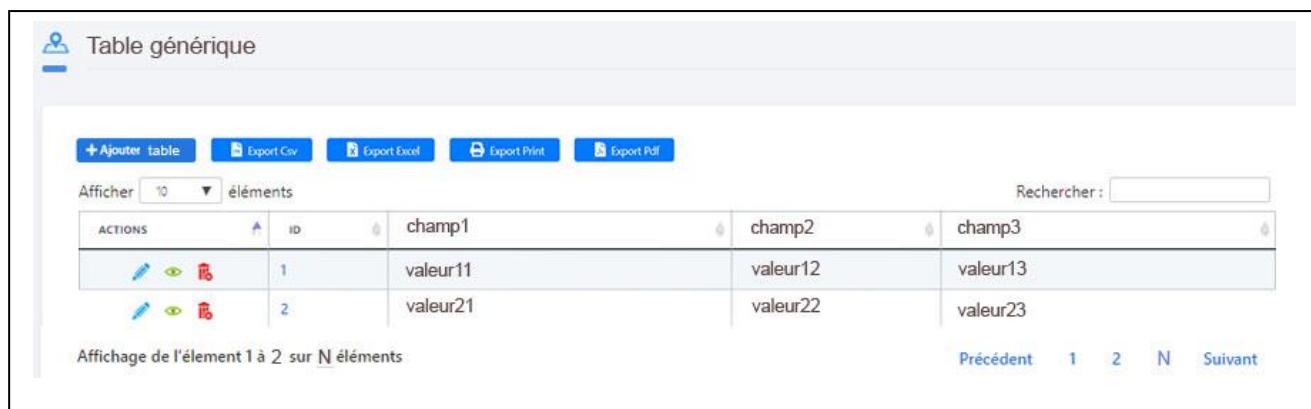

This role is reserved for training establishments and gives them the right to:

- create and edit their own profile
- view job offers
- use the geo-location tool allowing them to search for establishments or businesses based on the chosen geographic area as well as the desired profession or sector of activity.
- View statistics about the establishment
- Enroll their learners and partners (creation of accounts)
- Administer and monitor the professional integration of their graduates
- Administer their partners (company – establishment network)

6/ Editing, consultation, deletion and search tools

6.1/ Tables presented in the form of a listing

Each list is presented in table form allowing you to sort, search and manage data

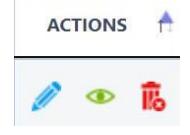

The screenshot shows a "Table générique" interface. At the top, there are buttons for "Ajouter table", "Export Csv", "Export Excel", "Export Print", and "Export Pdf". Below this is a search bar labeled "Rechercher:" and a dropdown for "Afficher" with the value "10 éléments". A "Champs" section lists columns: "ACTIONS", "ID", "champ1", "champ2", and "champ3". Under "ACTIONS" are icons for edit, view, and delete. Two rows of data are shown: Row 1 with ID 1, champ1 "valeur11", champ2 "valeur12", and champ3 "valeur13"; Row 2 with ID 2, champ1 "valeur21", champ2 "valeur22", and champ3 "valeur23". At the bottom, it says "Affichage de l'élément 1 à 2 sur N éléments" and "Précédent 1 2 N Suivant".

6.2/ Actions on entities

Add an entity (at the end of the table) →

+ Ajouter un pays

Edit, view, delete entity

Export

→ Export Csv Export Excel Export Print Export Pdf

6.3/ The entity search engine

Search across all entities and their parameters

→ Rechercher :

7/ Setting tables

7.1/ Geographic data tables

3 linked tables to find a city, a region in the selected country.

If the country is valid, the statistics results will be visible in the dashboard.

These tables are created by the application administrator, the statistics results are broadcast only from these cities and regions.

The other cities, street and number, locality are useful for the precision of the calculation of the geographical coordinates of Google Maps. The other cities are stored and can be added to the city table after approval by the application administrator.

7.1.1/ The country table

A country must include a national currency and a telephone code and a number of telephone digits

Country Table							
ACTIONS	ID	NOM	CODE ISO 3	DEVISE	IND TÉL.	NB DIGIT TÉL.	VALIDE
	1	Sénégal	SEN	FRANC CFA	221	9	X
	2	Togo	TGO	FRANC CFA	228	8	X
	3	Mali	MAL	FRANC CFA	223	8	X
	4	Côte d'Ivoire	CIV	FRANC CFA	225	8	
	5	Madagascar	MAD	ARIARY MALGACHE	261	9	X
	6	Bénin	BEN	FRANC CFA	229	0	
	7	Gabon	GAB	FRANC CFA	241	8	X
	8	RDC	RDC	FRANC CONGOLAIS	243	9	X
	9	Tchad	TCH	FRANC CFA	235	0	
	10	Niger	NIG	FRANC CFA	234	8	X

7.1.2/ The table of regions

The region must be linked to a country in the Country table

Please note, In Province/Country/Cities mode, this table becomes the COUNTRY table

Region Table							
ACTIONS	ID	NAME	PAYS				
	15	Bouenza	Congo Brazzaville				
	22	Brazzaville	Congo Brazzaville				
	36	Bujumbura	Burundi				
	26	Cuvette	Congo Brazzaville				
	25	Cuvette-Ouest	Congo Brazzaville				
	1	Dakar	Sénégal				
	6	Diourbel	Sénégal				
	27	Estuaire	Gabon				
	8	Fatick	Sénégal				
	28	Haut-Ogooué	Gabon				

7.1.2/ The table of prefectures

The prefecture is optional and must be linked to a country in the Region table

Prefecture Table							
ACTIONS	ID	NAME	PAYS				
	15	Bouenza	Congo Brazzaville				
	22	Brazzaville	Congo Brazzaville				
	36	Bujumbura	Burundi				
	26	Cuvette	Congo Brazzaville				
	25	Cuvette-Ouest	Congo Brazzaville				
	1	Dakar	Sénégal				
	6	Diourbel	Sénégal				
	27	Estuaire	Gabon				
	8	Fatick	Sénégal				
	28	Haut-Ogooué	Gabon				

7.1.3/ The cities table

The city must be linked to a region in the Region table or the Prefecture table

Liste des villes						
ACTIONS	ID	NOM	CAPITALE	RÉGION	PAYS	Ville
	1	Yoff-Mermoz	Non	Dakar	Sénégal	
	2	Dakar	Non	Dakar	Sénégal	
	3	Pikine	Non	Dakar	Sénégal	
	5	Thiès	Non	Thiès	Sénégal	
	6	Touba	Non	Diourbel	Sénégal	
	7	Goudiawaye	Non	Dakar	Sénégal	
	8	Kaoslack	Non	Kaoslack	Sénégal	
	9	Mbour	Non	Thiès	Sénégal	
	10	Saint-Louis	Non	Saint Louis	Sénégal	
	11	Rufisque	Non	Dakar	Sénégal	

7.1.4/ The currency table

The country must be linked to a currency

Name: field used in questionnaires and gives the monetary unit

Name Iso: generally identical to the symbol except for different alphabets

Liste des devises						
ACTIONS	ID	NOM	NOM ISO	NUM ISO	SYMBOLE ISO	Diédres
	1	Franc CFA	CFA	XAF	CFA	
	3	Ariary malgache	MGA	MGA	MGA	
	4	Franc congolais	CDF	CDF	CDF	
	5	Gourde	HTG	HTG	HTG	
	7	Dirham marocain	MAD	MAD	MAD	
	8	Dinar tunisien	TND	TND	TND	
	10	Escudo cap-verdien	CVE	CVE	CVE	
	9	Franc guinéen	GNF	GNF	GNF	
	10	Franc rwandais	RWF	RWF	RWF	
	11	Franc burundais	BIF	BIF	BIF	

Iso symbol: field used to view the results

Num Iso: This code is used for monetary exchanges

7.2/ Business data table

7.2.1/ The table of sectors

The professions/sectors are linked to this table

Liste des secteurs d'activité			
ACTIONS	ID	NOM	DESCRIPTION

8 / The profiles of the actors

The administrator cannot create an actor directly, they must be created by the company, the graduate or the establishment or through an investigator and imperatively through the account creation interface.

Access to each account must also be done from the login interface.

The administrator can, however, administer all the data created from the administration interface, edit and delete them.

Warning: Deleting a user will delete without return

- connection settings
- the profile or account of the actor associated with this user
- the questionnaires associated with this user

Improved statistics:

The administrator can modify all the fields, by adjusting the configuration tables, it is wise to rectify certain fields.

So for example if the “Other City” field has been filled in, and it has been added to the cities table, it becomes possible to select it in the “nearest city” field

The statistics will be more precise.

General Data Protection Regulation:

You must agree to share your personal data in order to create your profile. You can refuse it at any time and all of your data will disappear from the database (profile data as well as all questionnaires)

Valider

Status of the Form when it was created by the graduate

Graduate Qualification:

Professions, cities and diplomas can be adjusted by the administrator after enriching the settings tables.

If an establishment creates its profile after that of the graduate, the administrator can also adjust this questionnaire

The Diaspora address is mandatory if the checkbox is on YES

Geographic coordinates should be entered manually if possible, it is easy to find them with Google Maps

The establishment must be chosen from the defined list, if it does not appear, choose "Other" and manually enter its name.

Please note, you will not be part of the establishment's list of students until they have created their profile and you will then have to update yours.

The Registration Number turns green when the establishment validates it, it is then impossible for the graduate to modify it

Professional situation:

The professional situation is an essential element in the graduate's profile because it will direct the application to offer them 1 of the 3 professional integration questionnaires that corresponds to them.

(Looking for a job, Looking for a job and Unemployed are redirected to the same questionnaire)

General Data Protection Regulation:

You must agree to share your personal data in order to create your profile. You can refuse it at any time and all of your data will disappear from the database (profile data as well as all questionnaires)

10 / The dashboard: statistics

The dashboard allows you to visualize the results in real time in the form of graphs and precise or global values. These results are obtained according to the values chosen with the geographic and period selectors at the top right of the page.

Pays	Région	Préfecture	durée	début	fin	Valider
<input style="border: none; width: 100px; height: 25px; background-color: #f0f0f0; border: 1px solid #ccc;" type="button" value="Togo"/>	<input style="border: none; width: 100px; height: 25px; background-color: #f0f0f0; border: 1px solid #ccc;" type="button" value="Toutes régions"/>	<input style="border: none; width: 100px; height: 25px; background-color: #f0f0f0; border: 1px solid #ccc;" type="button" value="Toutes préfectures"/>	<input style="border: none; width: 100px; height: 25px; background-color: #f0f0f0; border: 1px solid #ccc;" type="button" value="3 ans"/>	<input style="border: none; width: 100px; height: 25px; background-color: #f0f0f0; border: 1px solid #ccc;" type="button" value="31/10/2020"/>	<input style="border: none; width: 100px; height: 25px; background-color: #f0f0f0; border: 1px solid #ccc;" type="button" value="31/10/2023"/>	<input style="background-color: #0070C0; color: white; border: 1px solid #0070C0; border-radius: 5px; padding: 5px; font-weight: bold;" type="button" value="Valider"/>

The dashboard has three distinct and completely independent parts.

Donut charts are used when the sum of the portions represents 100% of the analyzed entity.

Bar charts are used when each portion can represent 100% of data for all the entities analyzed.

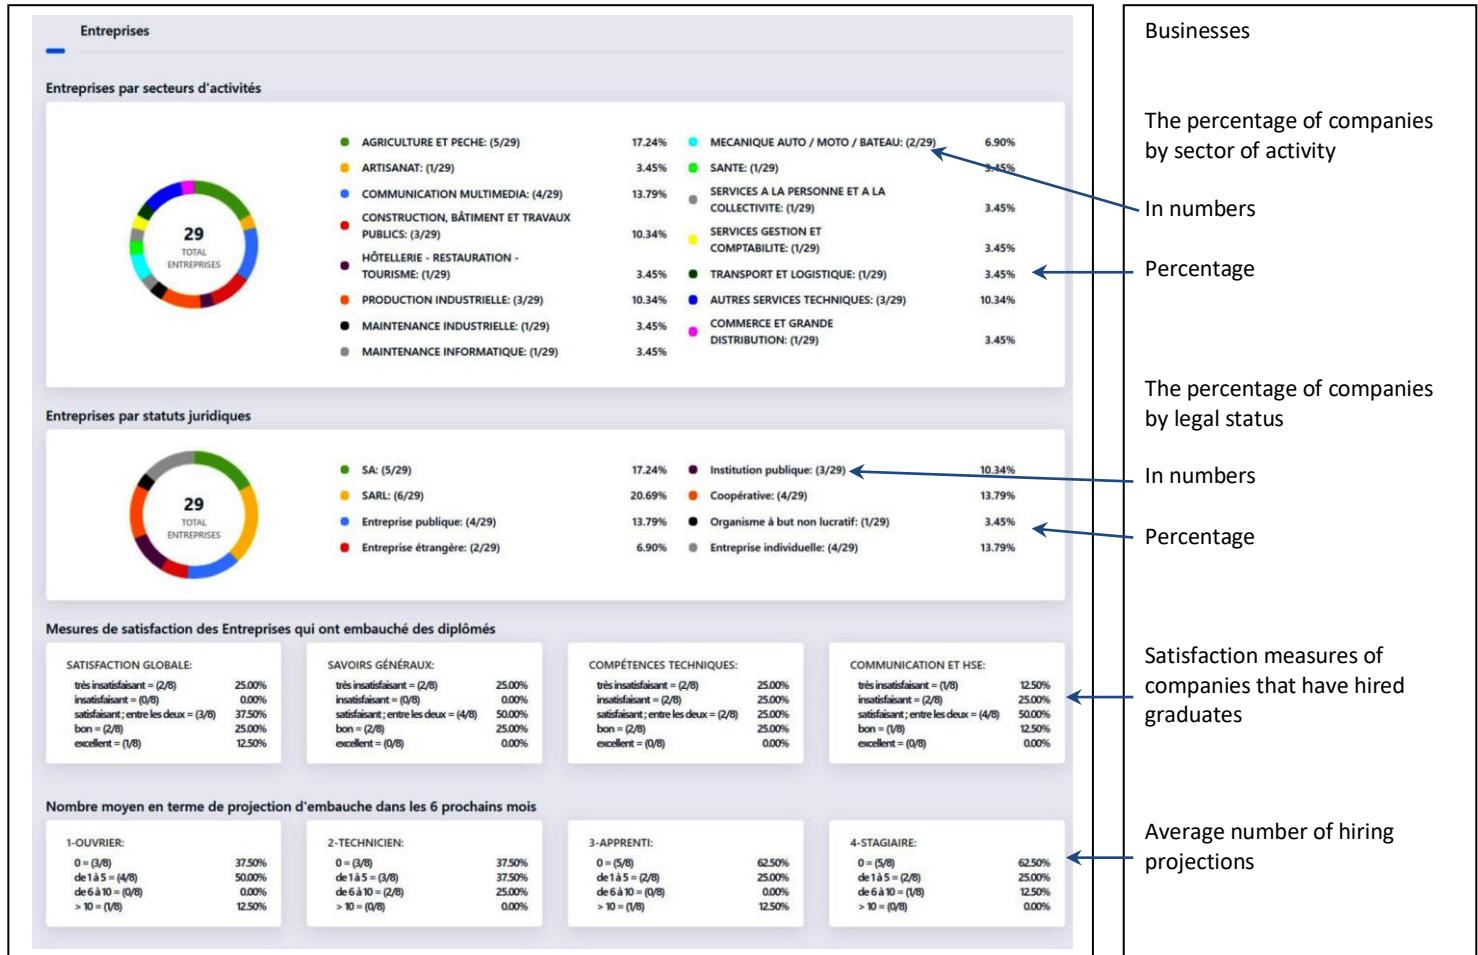

Curves are used to show the evolution of an entity type over time.

The first part represents the distribution of sectors of activity and legal statuses of companies as well as the measurement of their overall satisfaction and the satisfaction by skill of their hired graduates.

The second part represents the distribution of sectors of activity and types of contracts of graduates as well as the measure of professional integration and other indicators representing the reasons for unemployment, the relationship between initial training and the profession practiced or even the usefulness and relevance of graduate training with the actual profession of the entrepreneur.

The third part corresponds to the activity of creating accounts and surveys

10.1/ business statistics

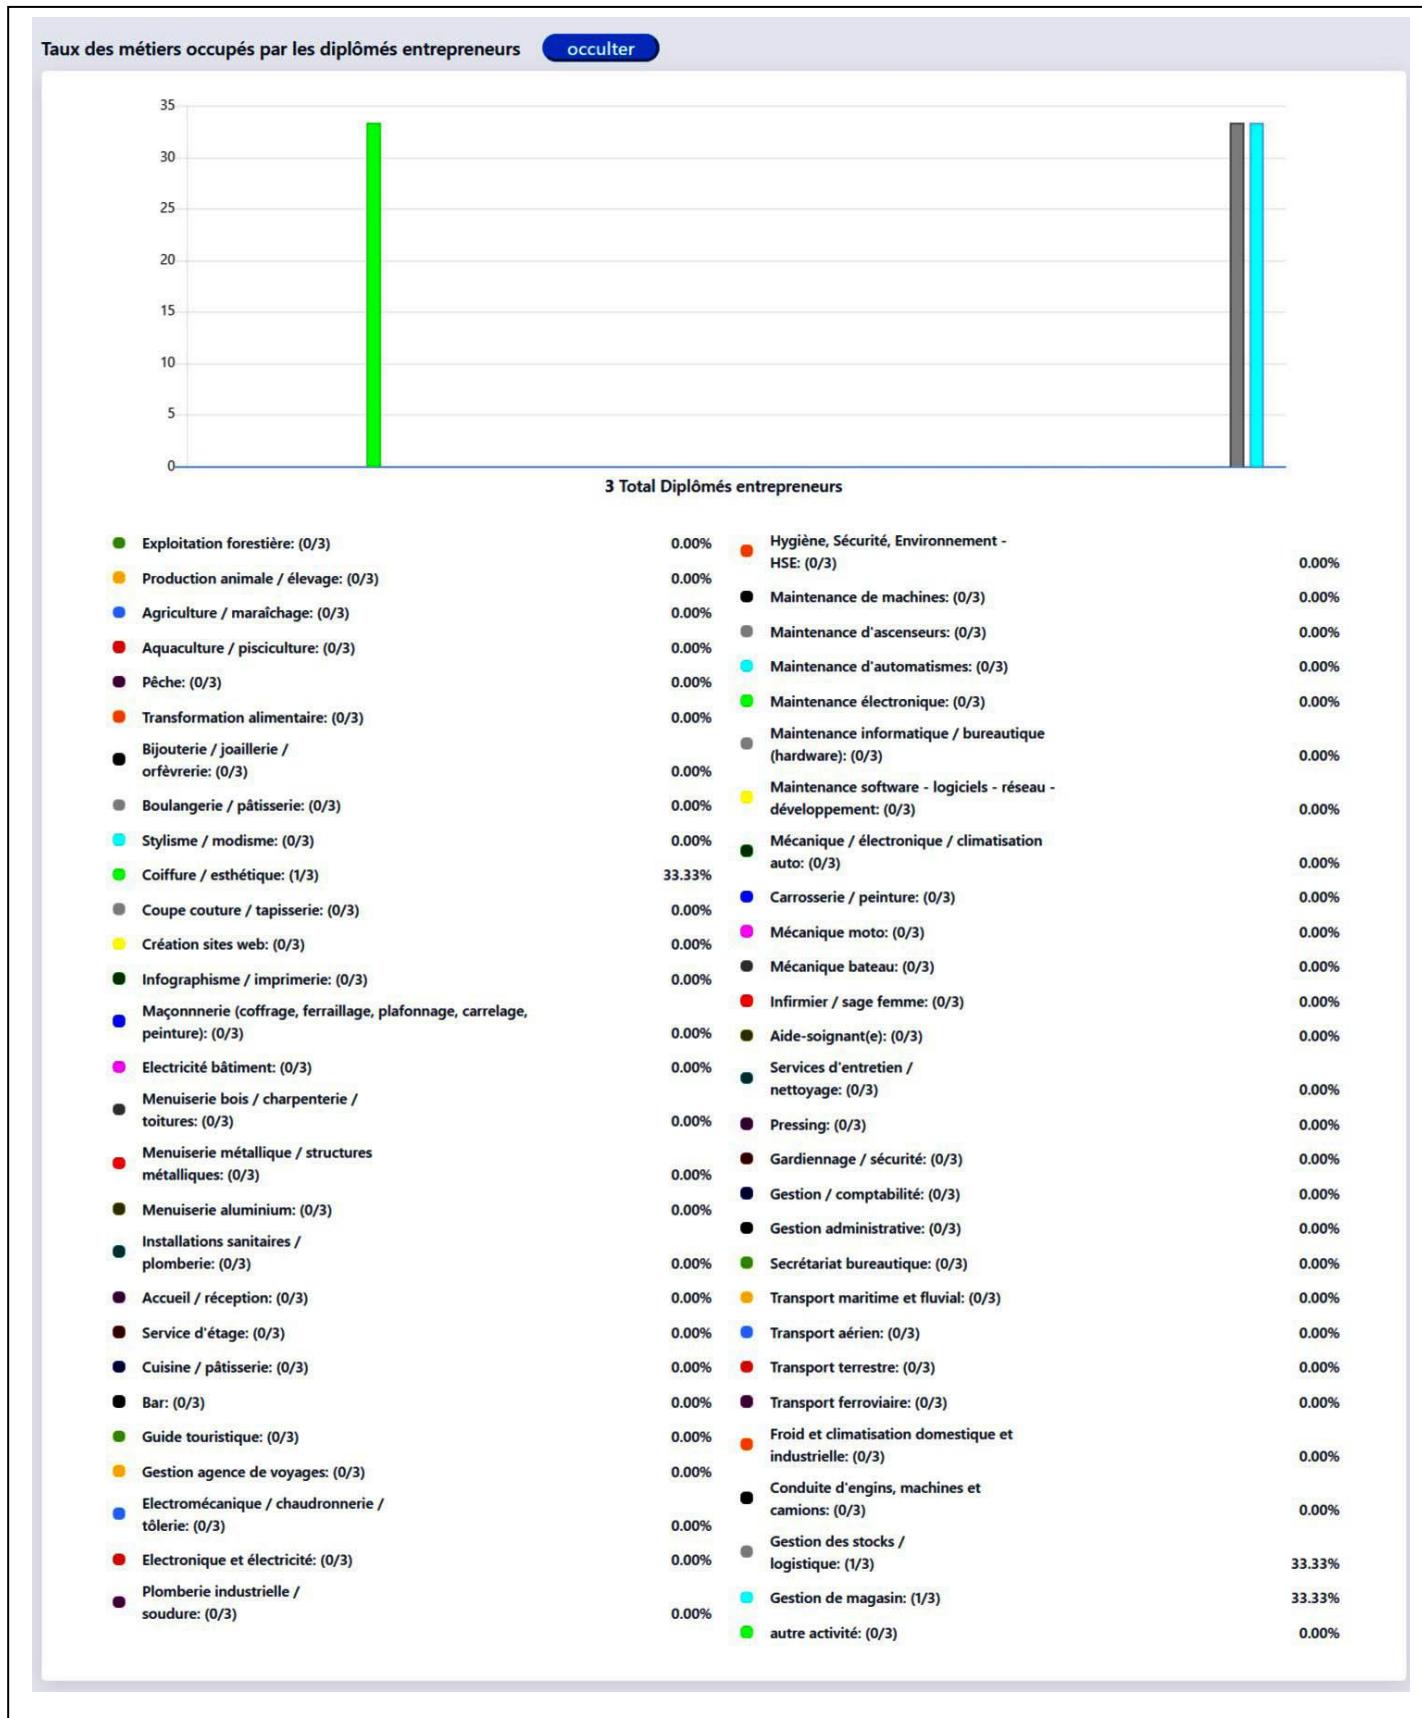

The details of the percentages of the sectors / professions are displayed by clicking the show/hide button. The results obtained are updated in real time based on the table of professions/sectors and the data collected in the profiles and questionnaires of graduates.

The details of the percentages of sectors / professions for entrepreneurs are displayed by clicking the show/hide button. The results obtained are updated in real time based on the table of professions/sectors and the data collected in the profiles and questionnaires of graduate entrepreneurs.

10.3 / Cleaning of users, job offers and geo-located coordinates

10.3.1 / User cleaning

This tool helps to search users by phone number part and batch delete selected users. For example, during training sessions, generic numbers are created. It also allows you to delete orphan accounts (which are no longer linked to an actor).

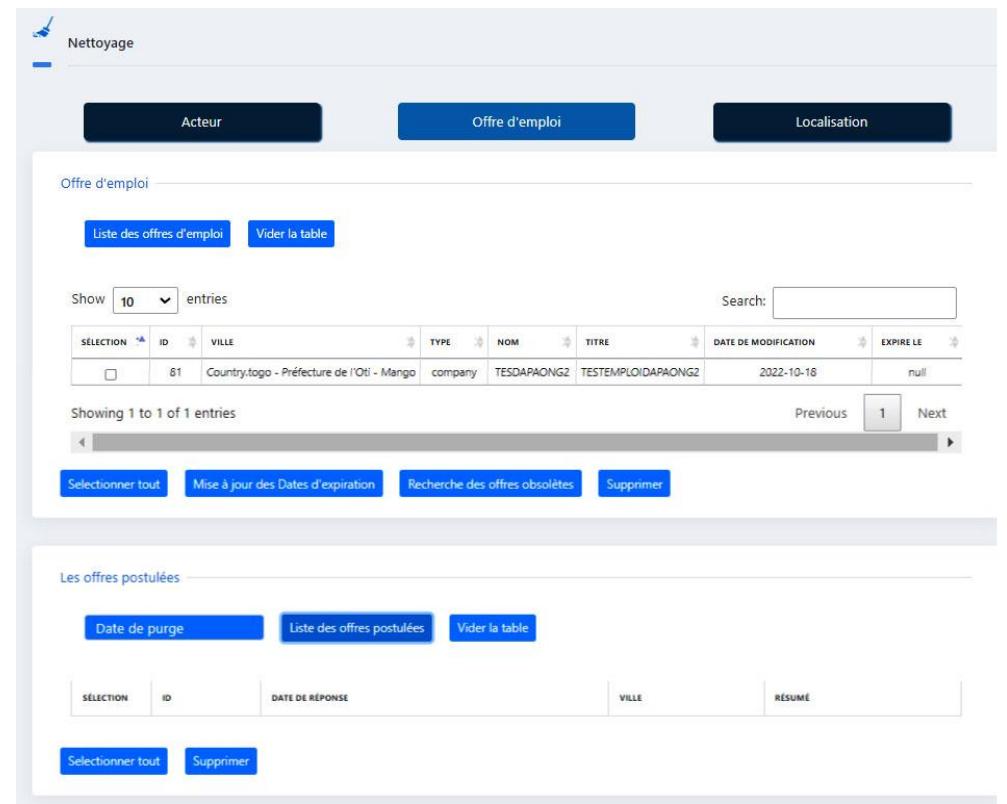

The screenshot shows the 'Nettoyage' (Cleaning) section for 'Acteur'. At the top, there are three tabs: 'Acteur' (selected), 'Offre d'emploi', and 'Localisation'. The 'Acteur' tab has a form with a dropdown 'Selectionnez votre pays' (Select your country) and a text input 'Entrez une partie du numéro de téléphone' (Enter a part of the telephone number). A button 'Rechercher les comptes à purger' (Search for accounts to purge) is present. Below the form is a note: '* Si numéro vide, alors recherche des users orphelins' (If number is empty, search for orphan users). A table lists users with columns: SELECTION, ID, NUMERO, and TYPE. The table contains three entries:

SELECTION	ID	NUMERO	TYPE
<input type="checkbox"/>	18912	+22893155961	Orphelin: ROLE_ENTREPRISE;
<input type="checkbox"/>	20155	+22892606397	Orphelin: ROLE_ENTREPRISE;
<input type="checkbox"/>	20303	+22898063715	Orphelin: ROLE_ENTREPRISE;

Below the table, it says 'Showing 1 to 10 of 196 entries'. There are buttons for 'Selectionner tout' (Select all), 'Supprimer' (Delete), and 'Vider la table' (Empty table). Navigation buttons for 'Previous' and 'Next' are also shown.

10.3.2 / Cleaning job offers

This tool allows, on the one hand, to search for obsolete offers (6 months after the expiration date) and delete them in batches and, on the other hand, to purge the applied offers to avoid overloading the database.

The screenshot shows the 'Nettoyage' (Cleaning) section for 'Offre d'emploi'. At the top, there are three tabs: 'Acteur' (selected), 'Offre d'emploi' (selected), and 'Localisation'. The 'Offre d'emploi' tab has a form with buttons 'Liste des offres d'emploi' (List of job offers) and 'Vider la table' (Empty table). Below the form is a table with columns: SÉLECTION, ID, VILLE, TYPE, NOM, TITRE, DATE DE MODIFICATION, and EXPIRE LE. One entry is shown:

SÉLECTION	ID	VILLE	TYPE	NOM	TITRE	DATE DE MODIFICATION	EXPIRE LE
<input type="checkbox"/>	81	Country.togo - Préfecture de l'Oti - Mango	company	TESDAPAONG2	TESTEMPLOIDAPAONG2	2022-10-18	null

Below the table, it says 'Showing 1 to 1 of 1 entries'. There are buttons for 'Selectionner tout' (Select all), 'Mise à jour des Dates d'expiration' (Update expiration dates), 'Recherche des offres obsolètes' (Search for obsolete offers), and 'Supprimer' (Delete). The next section, 'Les offres postulées', has buttons 'Date de purge' (Purge date), 'Liste des offres postulées' (List of applied offers), and 'Vider la table' (Empty table). A table with columns: SÉLECTION, ID, DATE DE RÉPONSE, VILLE, and RÉSUMÉ is shown, but it is currently empty.

10.3.3 / Cleaning and searching for geolocation coordinates

This tool allows you to recalculate geolocation coordinates that have not been entered, but also recalculate them to avoid their superposition on the Google Maps map.

The search for actors without location is done in 2 steps:

- 1 search for coos
- 2 update of coordinates in the database

10.4 / Activity monitoring

These 2 diagrams make it possible to follow the evolution of the volume of the actors surveyed over time and thus make it possible to interpret the results obtained. The time period is selected via the time selector at the top of the page.

Evolution of the number of graduate account creations
And surveys associated with graduates

Evolution of the number of business account creations
And surveys associated with businesses

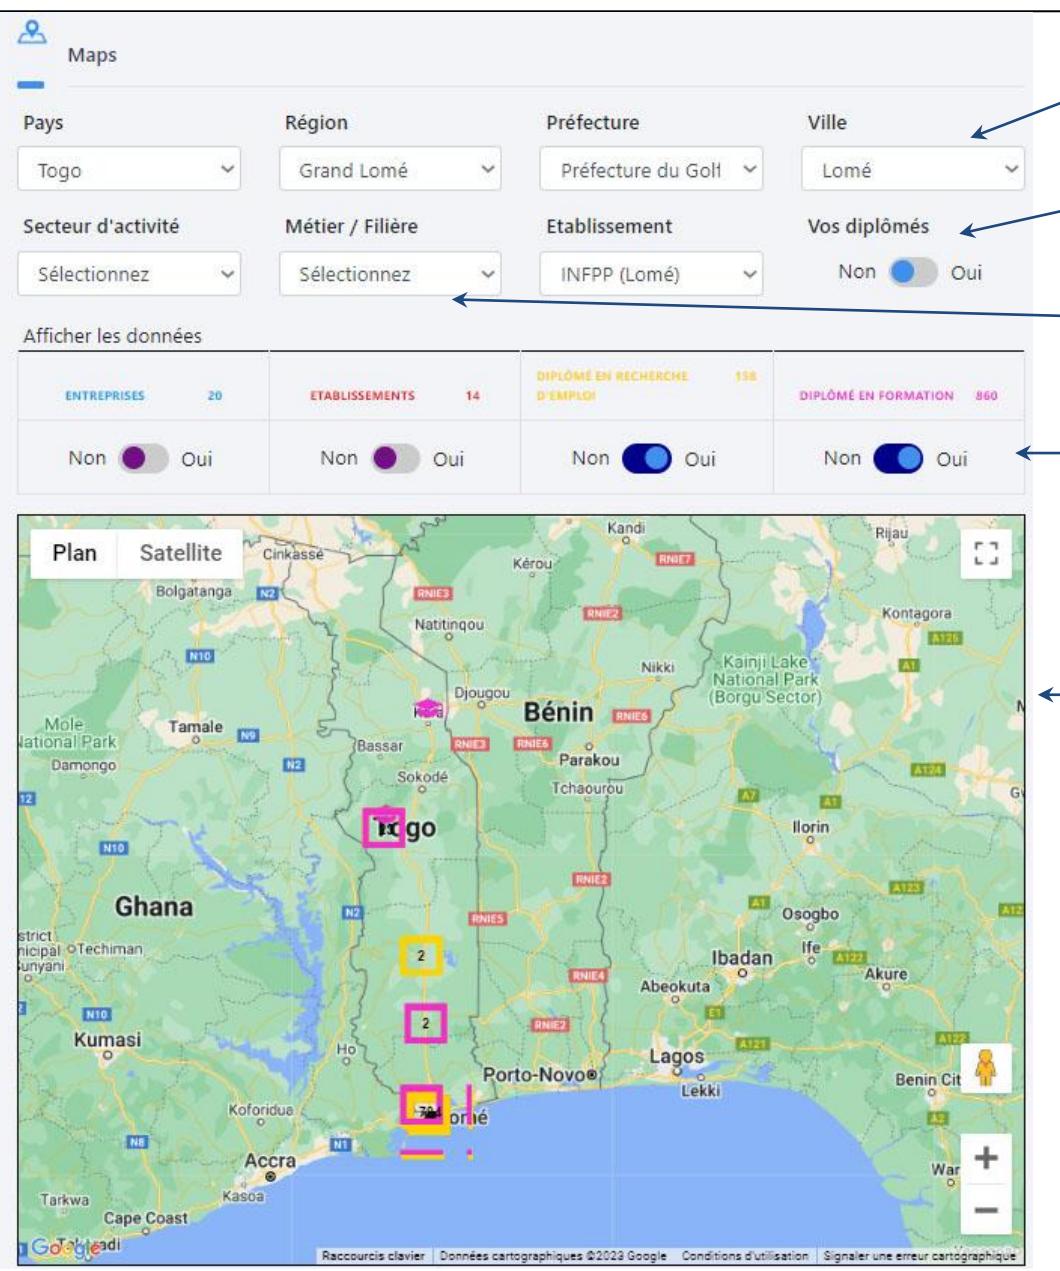

11 / The geolocation module

This module uses the Google Map API, it allows you to navigate geographically, and display the actors (companies, establishments and graduates) according to the chosen geographical area.

It is also possible to filter these players by sectors of activity and by profession/sector and to find or locate professional partners.

Since version v341, it is possible to filter on learners and graduates of establishments

The interface consists of two main sections. On the left is a sidebar with a 'Maps' icon and a tree icon. Below it are four dropdown menus: 'Pays' (Togo), 'Région' (Grand Lomé), 'Préfecture' (Préfecture du Golfe), and 'Ville' (Lomé). To the right of these are four input fields: 'Secteur d'activité' (Selectionnez), 'Métier / Filière' (Selectionnez), 'Etablissement' (INFPP (Lomé)), and 'Vos diplômés' (Non Oui). Below these are two rows of buttons for filtering 'ENTREPRISES' (20), 'ETABLISSEMENTS' (14), 'DIPLOMÉ EN RECHERCHE D'EMPLOI' (158), and 'DIPLOMÉ EN FORMATION' (860). Each row has a 'Non Oui ' button. A large map of West Africa is on the right, showing Togo, Ghana, and Benin. It features several yellow and pink highlighted areas, likely indicating specific regions of interest. The map includes labels for cities like Koudougou, Parakou, and Lomé, and roads labeled RNIE1 through RNIE7.

Geographic filters
Filters establishments and their graduates

Sector and profession filters

Actor Selectors

Google Map API

12/ Database configuration commands from a terminal:

The administrator can perform special commands from a terminal allowing the database to be updated; for this, it is necessary to have a Linux command shell interface such as Putty, Mingw64 or other.

Go to the Inserjeune application folder:

example: cd /c/wamp64/www/inserjeune-v341

List of available commands:

- Creating a Super Admin user:
`php bin/console app:create-admin --phone=+224999888777 --username=administrator --email=admin@ifef.2023 --password=Admin@ifef2023`
- Importing the translations file: It is possible to add new translation fields, it is then necessary to configure the config/services.yaml file: app.supported_locales and add the “locales” (ex fr = French)
`php bin/console app:import-translation-from-csv --csv file.csv --outputdir_xml <path_inserjeune>/translations --outputdir_json <path_inserjeune>//public/locale`
- Importing the file of the countries of the world with their currency their capital (with the region)
`php bin/console app:import-countries-from-csv --csv file.csv --f=true`
- Import tables of sectors, activity, legal statuses, employment contracts, diplomas This command replaces the name of the data in the table so that they can be translated
`php bin/console app:update_database_from_translation_file --csv file.csv`
- Launch the automatic restart command from the Crontab
`php <inserjeune_install folder>/bin/console app:send-mail-relaunch --log_dir <log folder>`
(Sends an email to users who have not yet responded to the questionnaire or who have responded more than a year ago).

13/ The options of the .env configuration file:

National adaptations are optional and are configured in the .env file:

1. Configuring Mysql Database Access
`DATABASE_URL="mysql://[user_mysql]:[passwd_mysql]@127.0.0.1:3306/[database_name]"`
2. Configuring the SMTP Mailer for Inserjeune
`MAILER_DSN=smtp://[mail_adr_postmaster]@[mail_domain]:[mdp_mail_postmaster]@[smtp_server_adr]:[smtp_server_port]`
3. Enable DBTA specific PROVINCE_COUNTRY_CITY architecture
`STRUCT_PROVINCE_COUNTRY_CITY=true`
4. Concatenate the Street, No. and Address fields of the actors' profiles in a single field
`CONCAT_LOCAL_ADDRESS=true`
5. Insert the Prefecture between the Region and the city
`PREFECTURE_BETWEEN_REGION_CITY=true`
6. Select the Excel file field for each of the 4 languages
 - `FR_FIELD_TRANSLATION=en`

- EN_FIELD_TRANSLATION=en
- PT_FIELD_TRANSLATION=pta
- ES_FIELD_TRANSLATION=es

14/ Installation of inserjeune on the web server:

Refer to the README.MD file in the root folder of the application

15/ Personalization of the Inserjeune application:

View headers

Edit the file <path Inserjeune>/template/_banner_top.html.twig and replace the logo link

The central description (between the two logos) is set in the translation Excel file, it is necessary to import this file using the command `app:import-translation-from-csv` (see §12)

Footer

Edit the file <path Inserjeune>/template/_footer_customize.html.twig and fill in the links as needed
